

DIMO MAINT APP BECOME MORE EFFICIENT!

ACCESS YOUR CMMS FROM YOUR MOBILE PHONE OR YOUR TABLET!

DIMO Maint APP is the result of more than 20 years of experience in publishing software solutions for maintenance management, and is viewed as the essential solution for technicians.

DIMO Maint APP is easy to use and reconciles essential CMMS functionalities with native functions of smartphones and tablets (voice recognition, photo, etc.).

DIMO Maint APP is a totally redesigned application to exploit CMMS functionalities in mobility situations.

The ergonomics of the application have been totally reworked to allow technicians, working in tough conditions, to still be able to use DIMO Maint CMMS easily, with its touch screen mode.

DIMO Maint APP is the best answer to:

- Simplify and help field data collection by technicians
- Accelerate data reporting towards CMMS
- Provide maintenance monitoring as closely as possible to reality in the field
- Increase your staff's productivity

- Quick and easy to deploy, with its Flash QR Code
- Easy to control and intuitive with no preliminary training required
- Continuously optimized interventions in the field

HOW IT WORKS

DIMO Maint APP is a hardware (smartphone, tablet) and software multiplatform solution (Android and iPhone).

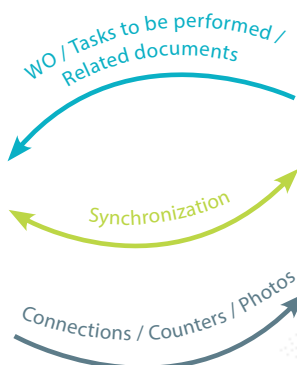

DIMO Maint APP works in disconnected mode to provide permanent data access and the ability to keep working whatever the network coverage. Synchronization gives efficient and secure information exchange.

Three languages are currently managed: French, English and Spanish.

DIMO Maint APP is connected to all the GMAO DIMO Maint software and benefits from the languages managed by the back office of the solution used.

In the field

- Mobile App
- Mobile user in disconnected mode
- Smartphone
- Tablette
- Android / Iphone

GMAO

- Software DIMO Maint
- Connected sedentary user

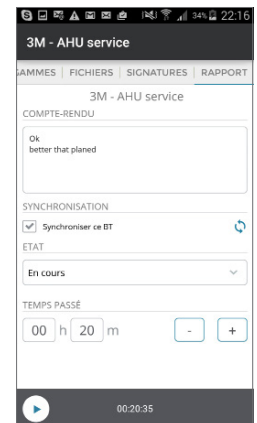

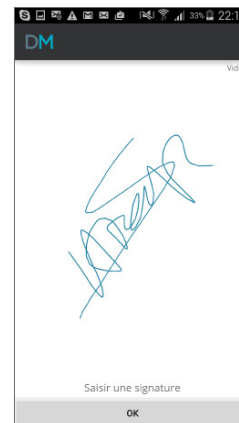

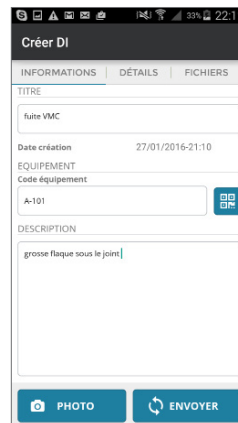

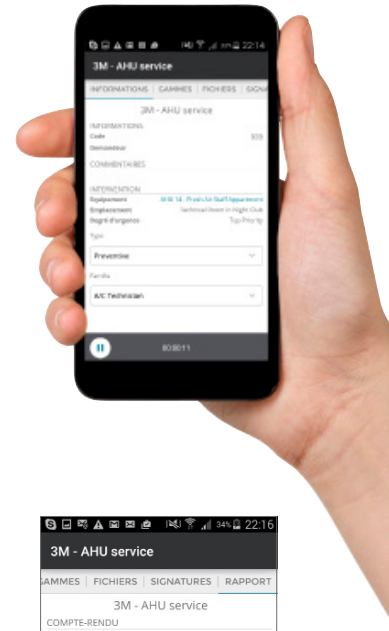

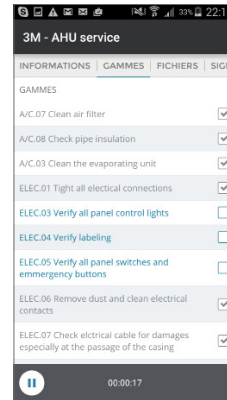

DIMO MAINT APP: A NEW WAY TO DEAL WITH INTERVENTIONS!

A list of best practices for maintenance technicians

- Quick viewing and identification of priority work to be carried out
- Consultation of assigned work orders
- A simple search for work orders linked to the equipment by showing one's QR code
- Perform a round for meter reading
- Search a reference in the article catalog
- Transform a WR into WO from the App

A WO form adapted to reports from the field

- Reliable, relevant information directly available on the intervention site
 - Access general information in the work order
 - Access the list of tasks required to perform the work (procedures, safety instructions, etc.)
 - Access the related files
- Intervention report and improvement of maintenance data
 - Updating the value of equipment counters via meter readings in the App
 - Taking pictures to fill out the WO description or prove that a piece of equipment has been put into operation
 - Vocal report
 - Registration intervention time facilitated by the play-pause button
 - Direct field recovery of the final client's signature on the BT
- Expected and unexpected use pieces for a work order

DIMO Maint APP is also the quick and easy creation of your intervention requests!

► Very soon...

- Create a work order
- Receive notification when a work order is allocated to you
- Turn an intervention request into a work order

Do you want to check whether the app will operate on your equipment ?

1 Download the application thanks to the QR Code or the link:

QR Code Android
