

Healthy and eco-friendly drinking with **SAP Business One**[®]

Before: Challenges and Opportunities

- Their old RP system was perfect for a small company, but as they were exponentially growing they needed a better one.
- One of their needs was to have a system that could cope better with their inventory control, purchasing and reporting.

Why SAP Business One and CitySoft

- Remedy Drinks decided to work with CitySoft on the implementation of SAP Business One.
- It was a six-month implementation process, which included planning.
- CitySoft was very helpful with the training, giving them plenty of options on how to work with the new system in the best way possible.

After: Value-Driven Results

- With SAP the visibility of their stock levels has saved a huge amount of time.
- This change will bring even more efficiency in terms of time and production.
- Remedy Drinks can look back 12 months after the implementation and say they have achieved the goals they had set.

“We plan to **grow the business internationally**, and we feel very confident that with SAP and CitySoft we'll be able to achieve that aspiration”

Gary Cobbledick, CEO, Remedy Drinks.
