

Technology Checklist

*Compare today's enterprise
management solutions*

A system designed to flex, not break as you grow.

Enterprises must continuously change to keep ahead of the competition, reduce silos, improve connectivity and respond rapidly to a changing world.

Organisations also need to drive continuous innovation with technology that helps them adapt faster.

So if you're thinking of replacing your legacy ERP system, start by asking yourself these three essential questions:

Is it fast enough for my business? >

Does it simplify needless complexity? >

Can it adapt to our requirements? >

Transform at the speed of insight.

When multi-facility management comes from one source, things move quickly. Unlike legacy ERP systems, today's enterprise management solutions brings it all together—purchasing, sales, customer service, and financial management—to create a single streamlined, high-speed system.

Please use the following interactive checklist to compare features from your current solution or other providers to the Sage Business Cloud X3 solution.

Which solution is fastest?	Solution 1	Solution 2	Sage X3
Offers a multi-tier architecture for highly reliable and scalable operations in all circumstances			✓
Enables a fast and asynchronous Web-stack that connects clients to apps and data over standard web protocol (HTTP/HTTPS) and APIs (SOAP/REST)			✓
Provides high-performance capabilities through web server and load balancer (Node.js), and integrated JavaScript execution engine			✓
Configures data structures and management rules common to a set of companies, with rule inheritance			✓
Allows for faster implementation and configuration			✓
Delivers user-role security and traceability management			✓
Flexibility with SQL/Oracle databases and Windows/Linux Servers			✓

Cut through complexity faster.

In our BYOD world, mobile has changed the way people work and your current ERP system may not deliver. Enterprise management software should be easy to implement, manage, and use—anywhere, anytime.

Please use the following interactive checklist to compare features from your current solution or other providers to the Sage Business Cloud X3 solution.

Which solution is simplest?	Solution 1	Solution 2	Sage X3
Simplifies software management while reducing overhead and other costs			✓
Easy to scale users by balancing loads across multiple applications and data servers			✓
Enables mobile and web deployments, providing access to common enterprise data from anywhere, on any device			✓
Ensures an intuitive HTML5-based browser experience, allowing for extensive personalisation by users			✓
Offers seamless integration with third party systems, through import/export web services			✓
Share real-time data across your entire IT infrastructure, more effectively and securely			✓

Tailored to your industry. Faster implementation.

Every company is unique, and your enterprise management solution should be built to adapt. That requires progressive capabilities designed to meet your industry's requirements, both domestic and international, with built-in functionality to serve your evolving needs.

Please use the following interactive checklist to compare features from your current solution or other providers to the Sage Business Cloud X3 solution.

Which solution is most flexible?	Solution 1	Solution 2	Sage X3
Offers a set of tools to ease system configuration and administration			✓
Deploys as partner-hosted, on-premise, or as a service-in-the cloud			✓
Improves agility, providing superior flexibility over existing on-premises collaboration platforms			✓
Provides an always-on console to manage components and services in one place			✓
Leverages enterprise-class business management functionality and security			✓
Delivers user-role security and traceability management			✓
Scales at a fraction of the cost and complexity of typical ERP systems			✓
Provides superior flexibility across a range of essential business processes			✓

Manage your global operation from one simple interface.

It's time you experienced enterprise management software that can quickly adapt to changing needs, streamline workflow processes and promote continuous collaboration. Because Sage Business Cloud X3 was designed specifically to address these issues, you get consistency and integration—ultimately leading to increased profitability. Fast, simple, and totally flexible, Sage X3 helps you to evolve without leaving anyone behind.

**Sage Business Cloud X3. More than ERP.
