CitySoft

Sage X3 for Food & Beverage Process Manufacturing

Sage X3 ERP project success story

The CitySoft Sage X3 ERP team have delivered another successful mid-market Sage X3 ERP project this time for a leading contract manufacturer of beverages.

Both the CitySoft project team and our clients project team joined forces to successfully deliver a major business technological transformation.

> Production in Sage X3 ERP started shortly after 8 am, as planned, with three bottling lines, forty-five Sage X3 ERP users & thirty-five Datalinx advanced warehousing users (across two sites) processing transactions.

Dan Southern (Practice Manager)

This mid-market contract manufacturer was transacting in the Sage X3 ERP system on day one-Go-Live without any major issues. The smooth launch is testament to the quality of preparation and execution by the project teams.

This go-live milestone marked the completion of one of the more complex Sage X3 ERP project delivered in Australia.

Simplicity | **Agility** | **Innovation** | **Integrity** | **Trust**

DIGITAL TRANSFORMATION

The project represented a major technological shift away from using old rudimentary systems, paper-based recording of data and an over-reliance on Excel. This was a massive business transformation that included finance, accounts and operations (Advanced production and warehousing).

The project involved more than just core Sage X3 ERP. It included -

- **Advanced business intelligence (SEI)**
- **Datalinx WMS –** Mobile Advanced Warehousing including SSCC, GS128 & Forklift Dashboards
- **Production / Manufacturing**
- **Affinda -** AP Automation
- **Procession -** (Quality Assurance and Formulations)
- **Zebra Hardware -** 45 Tablets, handhelds and desktop & mobile printers
- **EVOCON -** Hardware and Software (OEE)
- **LYNQ** - Advanced planning, scheduling and MES.
- **Ivanti –** Mobile device management (MDM)
- **EDI** - Bidirectional EDI integration to Coles

The advanced business system solution included **eighty-four custom items**, (RICEFW items) – custom reports, interfaces, advanced data conversions, enhancements (Developments) forms and workflows including a bespoke winemaking solution tailored specifically for our client's business.
