

Are you ready for tomorrow?

Discover the ERP built for growing
businesses. Right sized for where you are.
Ready for where you're going.

Today.
Tomorrow.
Forever.

Today: Stabilise & Simplify

Everything connected. Less friction,
more control.

You see it when it takes three weeks to close last month's books. You feel it in the trust issues between the warehouse and the sales team. You hear it when a new hire asks which spreadsheet is actually the "master" version. And you recognize it in the workarounds that have somehow become standard practice.

SAP Business One is the answer to that friction. It's an ERP built for the reality of SMEs: connecting finance, sales, CRM, logistics, and analytics in a single, responsive platform – so your operation moves as one, thinks as one, and grows as one. It's designed to implement cleanly and fit around a working business, so you start seeing the difference in weeks, not years.

THE VALUE OF A SINGLE
SOURCE OF TRUTH

“

When everyone's working
from the same data,
decisions stop lagging
behind the business.

➤ **One platform. Zero friction.**

Instead of a patchwork of applications, you have one integrated system. Information flows automatically from a sales order to a purchase request to the general ledger. No handoffs, no delays, and no duplicate data entry. It's the difference between a collection of departments and a unified team.

➤ **A reality everyone agrees on.**

Decisions lag when data is in dispute. With a single source of truth, every part of the business is working from the same reality – stock, cash flow, customer activity. All current. All accurate. You stop debating whose spreadsheet is right and start acting on what the data is telling you.

➤ **Less manual work. More valuable work.**

Your best people shouldn't be spending time on manual tasks like chasing invoices. SAP Business One automates the routine - approvals, reconciliations, and reporting - freeing your staff to focus on the things that actually move the needle: customers, strategy, and growth.

➤ **The office, without the walls.**

The modern business doesn't sit still. Through the SAP Business One Web Client, your team has secure, real-time access to the entire operation from any device, anywhere. Whether they're at home, on-site, or on the road, they have the same ability to act as if they were sitting at their desk.

THIS IS THE POINT WHERE GROWTH STOPS FEELING LIKE SOMETHING TO MANAGE - AND STARTS FEELING LIKE SOMETHING TO PURSUE.

Tomorrow: Accelerate & Anticipate

Plan with clarity. Go after opportunities with confidence.

When your operation is connected, your business makes a fundamental shift: from reactive to proactive. Problems surface before they become crises. Bottlenecks are visible before they impact the customer. The opportunities that once felt out of reach suddenly start to look like realistic targets.

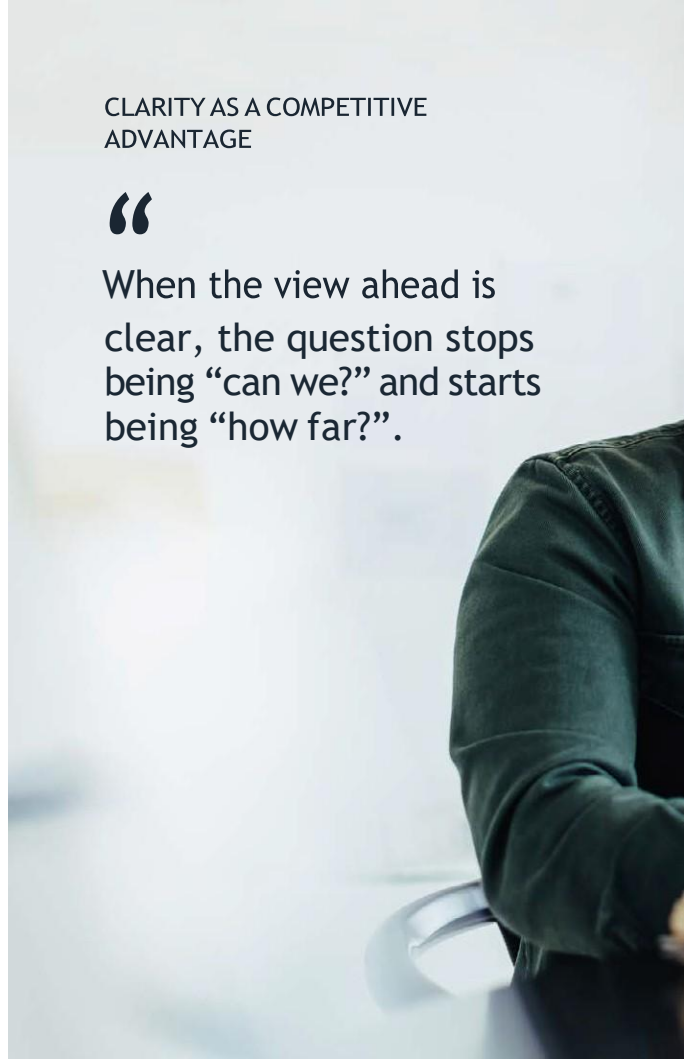

This isn't only about internal clarity; it's about how the world sees you - and the doors that opens. The larger customers, international investors and global partners worth pursuing evaluate businesses on more than product. They look for operational maturity, auditable controls and a level of transparency that only a serious business system can deliver.

Running SAP Business One signals to the market that you offer the structure and consistency of a major player, with the agility of an SME, so you can punch well above your weight.

CLARITY AS A COMPETITIVE
ADVANTAGE

“

When the view ahead is clear, the question stops being “can we?” and starts being “how far?”.

➤ **Less hindsight. More foresight.**

The best decisions aren't made in response to last month's numbers. SAP Business One has predictive forecasting built in – across demand, cash flow, inventory and sales – so your teams can see what's coming and act on it before it arrives. Less firefighting. More forward planning.

➤ **Earn the right to win bigger.**

Passing a tier-one audit, winning a contract that previously went to a larger competitor, getting on a preferred supplier list that once felt beyond reach – SAP Business One gives you the enterprise-grade credentials to go after all of them.

➤ **Global expansion without the friction.**

Expanding into new markets shouldn't mean reinventing your back office. With support for 28 languages and 50 country-specific localizations, SAP Business One handles local tax, legal compliance, and multiple currencies as standard. Whether you're opening a new entity or a new warehouse abroad, the framework is already there.

➤ **AI and automation that already “gets” your business.**

Stop chasing the hype cycle. Through certified SAP partners, you gain access to proven AI and automation tools built specifically for your platform. Because these capabilities live inside your ERP, they already understand your data, workflows and context. You get advanced technology that works from day one, without the research, risk, or technical debt of a bolt-on solution.

DECISIONS ARE NO LONGER SHAPED BY WHAT'S HAPPENING NOW,
BUT BY WHAT'S ALREADY COMING INTO VIEW.

Forever: Scale & Sustain

Welcome to SAP. There's no limit to where this goes.

Choosing SAP marks the turning point where you stop worrying about outgrowing your infrastructure and start belonging to something built for wherever your ambitions take you.

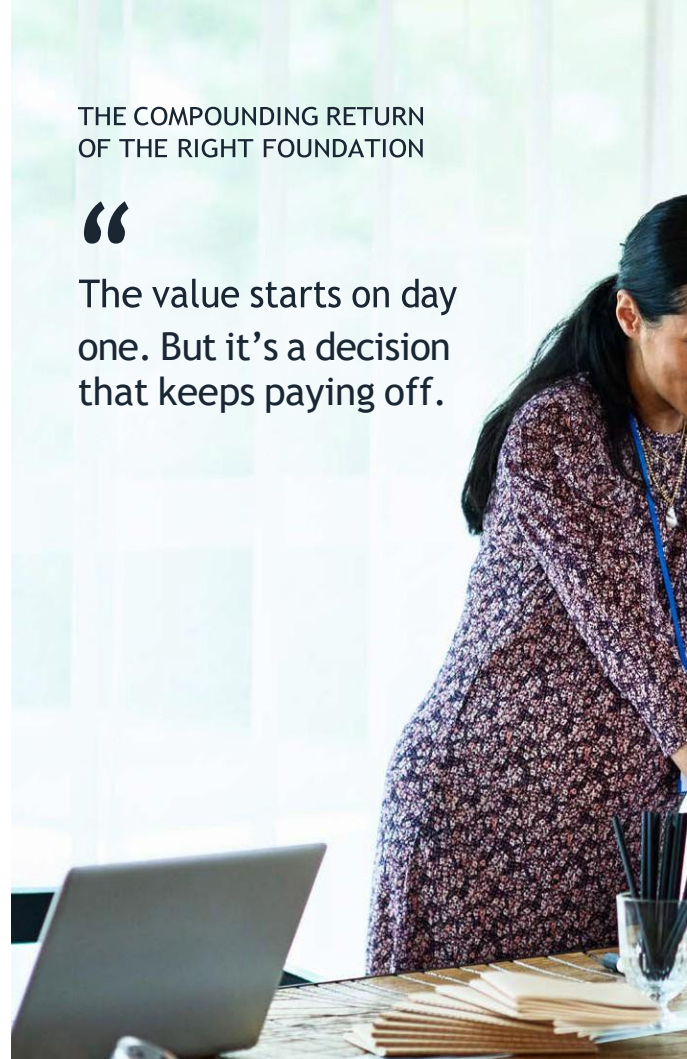

That belonging comes with two relationships that will define your next chapters. The first is SAP itself: a company that has led the ERP market for more than 50 years – staying ahead of where business and technology are going so you don't have to. The second is your local SAP partner – specialists who know the platform, know your industry, and will come to know your business as well as you do.

Together, they give you the room to grow and the support to get there – at your own pace, on your own terms, with everything in place whenever you're ready for it.

THE COMPOUNDING RETURN
OF THE RIGHT FOUNDATION

“

The value starts on day one. But it's a decision that keeps paying off.

➤ **Intelligence you don't have to build.**

SAP has spent decades shaping how the world's best-run businesses operate – and that knowledge is embedded into SAP Business One. Best practices to close the books, manage a supply chain, or handle a complex audit aren't something you have to figure out. They're already there.

➤ **A partnership that increases in value over time.**

With your SAP partner, go-live is just the beginning. As their knowledge of your business deepens – your processes, your priorities, your way of doing things – so does what you get from the relationship. Until before long, they're not just responding to what you need – they're anticipating it.

➤ **Always on the right side of change.**

Regulations tighten. Technologies advance. Standards evolve. No business has the bandwidth to stay across all of it, and nor should they have to. Inside the SAP ecosystem, they don't. SAP monitors everything that matters, and ensures the solutions are there when you need them. You stay current, compliant, and focused on growth.

➤ **A decision you won't have to revisit.**

Whether you're looking to launch a new business model next quarter or move toward more sophisticated enterprise capabilities years from now, everything you need is waiting for you – and SAP's roadmap means it will keep evolving ahead of you.

YOU'VE SEEN WHAT'S POSSIBLE. THE ONLY THING LEFT TO DECIDE IS HOW SOON YOU WANT TO GET THERE.

Built for the businesses that won't wait.

SAP Business One is built for ambitious SMEs who recognize that the right foundation changes everything. With 83,000+ customers across 170 countries, it's the proven choice for leaders who want to move fast, think further ahead, and never outgrow their platform.

Ready to see what's possible?
It all starts with a conversation.

Today.
Tomorrow.
Forever.
